**Educational Partners**

**SAN DIEGO COUNTY'S REGIONAL ALLIED HEALTH AND SCIENCE INITIATIVE (RAHSI)**  
Established 2006

**RAHSI is a collaborative effort to improve students' success in healthcare careers.**

The project is supported by the Governor of California's Career-Technical Education (CTE) Initiative and the Grossmont-Cuyamaca Community College District.

**WHAT WE DO**

The Regional Allied Health and Science Initiative (RAHSI) supports the building and implementation of high school Health Career Pathway programs in San Diego County, with a focus on:

- Curricula
- Industry partnerships
- Teacher/counselor externships and professional development
- Countywide collaboration among middle and high school and college students, teachers, counselors, and administrators

**RAHSI is intended for students of all academic levels and backgrounds.**

**OUR GOALS**

- Increase middle and high school students' awareness of health career opportunities
- Improve performance in high school and college science courses
- Improve transition and retention rates in college programs

**RAHSI was founded because:**

- Without the critical element of succeeding in college science coursework, a student will be limited to entry-level healthcare careers and cannot proceed to higher career ladders
- A single course or activity is not enough to ensure success in "gatekeeper" college science coursework

Project evaluation by **harder+company** and **WestEd**

Additional information about the RAHSI project can be found on the [About Us](#), [FAQ](#) and [Contacts](#) pages.
