

Textbook Resources for Health Pathway Instructors

Dear Instructor: While developing a new course can be challenging, the right resources and perspective will help you reduce unnecessary strife. We hear again and again from industry that adolescents are not being adequately prepared for the workplace of the 21st Century. Health Pathway courses are an attempt at bridging the gap between formal education and the workplace. There is no one resource that will independently guide you through development of a rigorous Health Pathway course. Many sources are needed.

In an attempt to aid educators, RAHSI has developed a proven Resource List that meets CA educational standards (note that standards can change; use your discretion). These resources will help you cover your curriculum while preparing students for healthcare training programs and the workplace. While it is far from comprehensive, it is a start. We highly recommend that you build your library of instructor resources to better achieve your goals and connect curriculum with workplace requirements. Good luck in your endeavors and please contact the RAHSI team with suggested additions.

–Rhian Purdy, RAHSI Science Curriculum Resource Instructor

P.S. Be sure to ask if a complimentary instructor review sample is available!

Text Title	Author/Publisher	ISBN # (Note: ISBNs change with new editions)
A Healthy Future: Careers in San Diego's Healthcare Sector	San Diego Workforce Partnership	http://www.sandiegowork.com/pdf/lmi/cluster_studies2/healthcare_occ_report2_healthy_future.pdf
Anatomy & Physiology for Emergency Care	Martini, Bledsoe et al/ Prentice Hall	978-0-13-234298-8
Anatomy & Physiology Coloring Workbook: A Complete Study Guide	Marieb/Pearson Benjamin Cummings	0-8053-7276-8
Anatomy & Physiology, Fundamentals of	Martini/Prentice Hall	0-8053-7280-6
Chemistry: An Intro to General, Organic, & Biological Chemistry*	Timberlake/Pearson Benjamin Cummings	978-0-80533015-1
(Brady) Emergency Care (AHA Update)	Limmer, O'Keefe et al/ Prentice Hall	978-0-13-159390-9
Emergency Preparedness for Health Professionals	Landesman/ EMC Paradigm	978-0-76383-397-8
